

# Run your clinic — from check-in to payment.

CliniqueX is the clinic management system for Malaysian GP clinics and chains: registration, queue, consultation, dispensing, billing, stock and reporting — in one place.

- Multi-branch ready
- Panels & billing built in
- PDPA-ready audit trail

THE DAILY REALITY

# Your clinic runs on too many disconnected tools.

Paper cards, a separate POS, stock in a spreadsheet, panel claims in a folder. Every handoff from front desk to dispensing is a chance to lose time, miss a charge, or run out of stock — and no one can see the whole picture, especially across branches.

- ✓ Registration, queue and billing live in different places
- ✓ Stock counts and dispensing don't talk to each other
- ✓ Panel claims are tracked by hand
- ✓ No single, live view across branches

**Paper / cards**

Lost notes, slow lookups

**Separate POS**

Charges missed, no link to stock

**Stock in Excel**

Stock-outs & expiry surprises

**Claims by hand**

Late, error-prone reimbursements

ONE SYSTEM

# From the patient's first step to the receipt they walk out with.

CliniqueX connects the whole clinic day in a single system — so the front desk, doctors, dispensary and owner all work from the same live data, in every branch.

## End to end

Check-in → queue → consult → dispense → pay, with stock and billing kept in sync.

## Multi-branch

Run each branch and see the whole chain from one place.

## Built for Malaysia

Panels & TPA, cash/card flows, and a PDPA-ready audit trail.

THE CLINIC DAY, IN ONE FLOW

# Every visit, managed end to end.

No re-keying between steps. Each stage updates the next — and the reports.

WHAT'S INCLUDED TODAY

# The full operational toolkit.

Registration & QR check-in

Live waiting-room queue

Consultation & records

Dispensing & billing

Payments (cash/card/panel)

Panel & TPA claim tracking

Medication catalog

Inventory & receiving (OCR)

Investigations ledger

Reports & analytics

BUILT FOR CHAINS

# Run every branch from one place.

Each branch gets its own queue, stock and day-to-day view. Staff are pinned to their branch; owners switch branches or see the whole chain. Patients are found across every branch.

A

Branch 1

own queue & stock

B

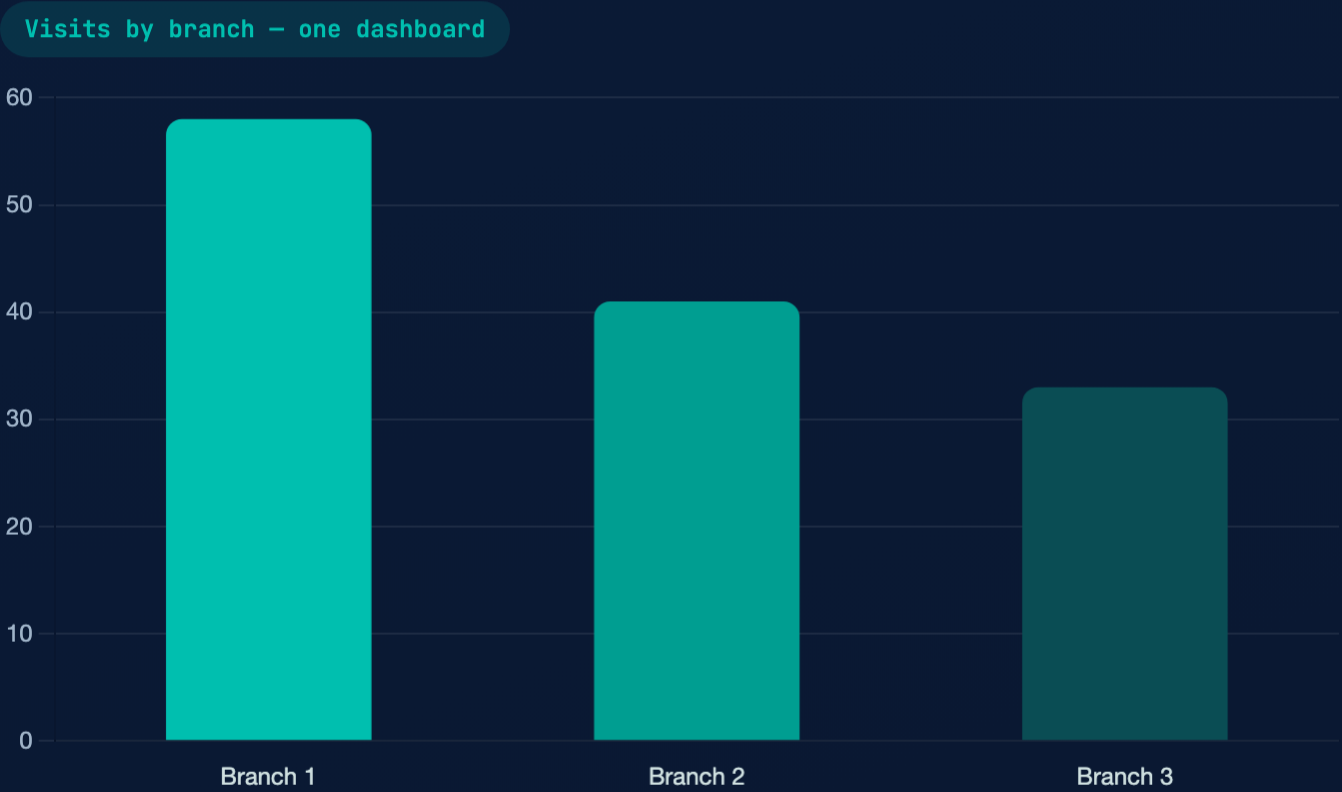

Branch 2

own queue & stock

C

Branch 3

own queue & stock

STOCK THAT STAYS HONEST

# Dispensing and inventory, connected.

**Itemized dispensing**

Bills push from the doctor in real time; stock decrements automatically as you dispense.

**Medication catalog**

Locked-identity drug catalog with a receive-only cost path — prices and stock stay consistent.

**Receiving with invoice OCR**

Upload a vendor invoice, review the scanned lines, and post straight to stock with cost snapshots.

**Controlled register**

Traceability and a controlled-drug register, with full movement search.

**Low-stock & expiry**

See low, zero and expiring items at a glance — before they bite.

**Investigations ledger**

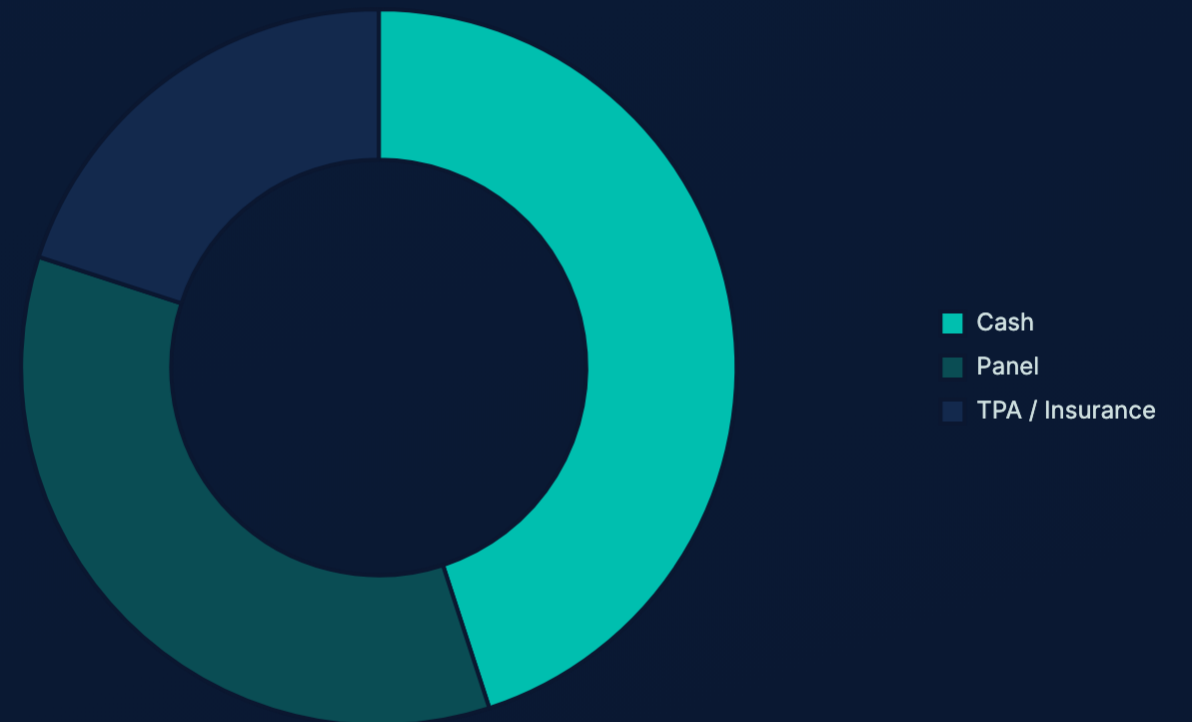

Lab, radiology, procedure and injection orders tracked in one ledger.

MONEY, TRACKED PROPERLY

## Billing, panels & reports that add up.

- ✓ Itemized bills with panel split (cash / card / panel)
- ✓ Panel & TPA claim ledger with limits & exceptions
- ✓ Receipts & full payment history
- ✓ Live reports: revenue, payer mix, service line, daily

Revenue by payer — example

Illustrative

CONTROL & TRUST

# Access, compliance and your data.

**Roles & branch access**

Per-person logins with five roles (admin, doctor, locum, staff, auditor) and staff pinned to their home branch.

**PDPA-ready audit trail**

Actions are logged; the doctor signs off before dispensing. Built around the clinical boundary.

**Works with your EMR**

A non-blocking sync queue bridges to Pluto, kumoDoc and Medico — with retries and fallback safety.

**Bring your data**

CSV import with a finance guide and import history, so you start with your real records.

WHY CLINICS CHOOSE CLINIQUEX

# One system that pays for itself in saved time.

**End to end**

Check-in to payment in one flow — no re-keying, no gaps.

**Multi-branch native**

Per-branch operations, one chain-wide view.

**Local by default**

Panels, TPA, cash/card flows and PDPA-ready records.

**Stock you can trust**

Dispensing, catalog and receiving stay in sync.

**Fits your EMR**

Non-blocking sync queue — no rip-and-replace.

**Live in days**

Import your data, set roles & branches, and go.

PRICING

# Simple plans that grow with you.

Save ~17% with annual billing (2 months free). Basic is per clinic; Pro & Ultra are priced per branch.

Basic

Single clinic

RM149 /mo

or RM1,490/year — save 17% · per clinic

✓ Core CMS: register, queue, consult
